

Saurav Raj

Location: Hazaribagh, Jharkhand, India **Website:** sauravraj.dev **Email:** saurav.raj.ash@gmail.com **GitHub:** vizvasrj
Phone: +91 9006912014 **Languages:** Hindi, English, French

Professional Summary

Highly experienced Back-end Developer with over 2.5 years in building multi-threaded and distributed microservice architectures, proficient in Python, Go, and a range of cloud services including AWS. Skilled in designing, implementing, and deploying scalable and reusable RESTful APIs using frameworks like Django and Flask. Demonstrated expertise in managing large datasets with PostgreSQL and Redis, optimizing application performance, and working with containerization (Docker) and orchestration (Kubernetes) in Linux environments. Committed to technical excellence and continuous learning to deliver high-quality, maintainable software.

Education

MCA (2024-2026) [8.87 SGPA] Aisect University, Jharkhand Major: Computer Application
BCA (2016-2019) [6.24 CGPA] Amity University Jharkhand Major: Computer Science and Information Technology

Skills

Backend & API Development: Python (4/5), Go (4/5), Django (4/5), Flask (3/5), Falcon (3/5), Gin (4/5), Mux (4/5), gRPC (3/5), RESTful APIs, Microservices, Distributed Systems, JWT Authentication, API Performance Optimization, Code Review. **Cloud & DevOps:** Linux (4/5), Shell Scripting (4/5), Docker (4/5), Kubernetes (2/5), AWS (4/5), GCP (4/5), DigitalOcean (3/5), Linode (3/5), ArubaCloud (3/5), Serverless Computing. **Databases & Data Processing:** PostgreSQL (4/5), Redis (4/5), MongoDB (3/5), DynamoDB (3/5), Large Data Set Analysis, Apache Kafka (2/5), AWS SQS (2/5), RabbitMQ (2/5). **Tools & Methodologies:** Git (4/5), Celery (4/5), BeautifulSoup (4/5), Unit/Functional/Integration Testing, Performance Profiling. **Other Languages:** Rust (3/5), JavaScript (2/5).

Certificates Earned

- **Professional Certificate: IBM AI Engineering (2025)** [View Certificate](#)
 - Course Certificates:
 - [Machine Learning with Python](#)
 - [Introduction to Deep Learning & Neural Networks with Keras](#)
 - [Deep Learning with Keras and Tensorflow](#)
 - [Introduction to Neural Networks and PyTorch](#)
 - [Deep Learning with PyTorch](#)
 - [AI Capstone Project with Deep Learning](#)
 - [Generative AI and LLMs: Architecture and Data Preparation](#)
 - [Gen AI Foundational Models for NLP & Language Understanding](#)
 - [Generative AI Language Modeling with Transformers](#)
 - [Generative AI Engineering and Fine-Tuning Transformers](#)
 - [Generative AI Advance Fine-Tuning for LLMs](#)
 - [Fundamentals of AI Agents Using RAG and LangChain](#)
 - [Project: Generative AI Applications with RAG and LangChain](#)
- **IBM Deep Learning with PyTorch, Keras and Tensorflow** [View Certificate](#)
- **IBM Full Stack Software Developer (2024)** [View Certificate](#)
 - Course Certificates:
 - [Introduction to Software Engineering](#)
 - [Introduction to Cloud Computing](#)
 - [Introduction to HTML, CSS, & JavaScript](#)
 - [Developing Front-End Apps with React](#)
 - [Developing Back-End Apps with Node.js and Express](#)
 - [Python for Data Science, AI & Development](#)
 - [Django Application Development with SQL and Databases](#)
 - [Application Development using Microservices and Serverless](#)
 - [Full Stack Application Development Capstone Project](#)
 - [Full Stack Software Developer Assessment](#)
 - [Generative AI: Elevate your Software Development Career](#)
 - [Software Developer Career Guide and Interview Preparation](#)
- **Specialization: Rust Programming Masterclass from Beginner to Expert from Packt (2024)** [View Certificate](#)
 - Course Certificates:
 - [Introduction to Rust Programming and Core Concepts](#)
 - [Intermediate Rust Programming and Advanced Concepts](#)

- [Advanced Rust Programming and Real-World Applications](#)
- **Specialization: Blockchain from University at Buffalo (2024)** [View Certificate](#)
 - Course Certificates:
 - [Blockchain Basics](#)
 - [Smart Contracts](#)
 - [Decentralized Applications \(Dapps\)](#)
 - [Blockchain Platforms](#)
- [Developing AI Applications with Python and Flask \(2024\)](#)
- [Generative AI: Elevate your Software Development Career \(2024\)](#)
- [Introduction to Containers w/ Docker, Kubernetes & OpenShift \(2024\)](#)
- [Architecting Solutions on AWS \(2023\)](#)
- [Architecting with Google Kubernetes Engine: Workloads \(2022\)](#)
- [Architecting with Google Kubernetes Engine: Foundations \(2022\)](#)
- [Google Cloud Fundamentals: Core Infrastructure \(2022\)](#)
- [Continuous Delivery with Jenkins in Kubernetes Engine \(2023\)](#)
- [Migrating a Monolithic Website to Microservices on Google Kubernetes Engine \(2023\)](#)
- Cisco Certified Network Associate Program (200-301) (2019) / Networkers Home (Bangalore, India)
- Arcsight Admin and Analyst (2019) / Siem Xpert (Bangalore, India)
- [Advanced Penetration Testing \(2019\)](#)
- [CompTIA Security+ \(2018\)](#)
- Ankit Fadia Certified Ethical Hacker Program 9.0 (2015)
- C Programming Techno-zeal, Silicon Institute of Technology (2015)

Experience

Full Stack Developer — aapan.shop Mar 2024 - Nov 2024 - Designed and developed scalable and maintainable backend microservices using GoLang with the Gin framework, ensuring high performance. - Implemented secure and efficient database solutions with MongoDB for robust data management, handling product catalogs and user data. - Optimized API performance and implemented RESTful endpoints for seamless user experience and efficient transaction processing.

Clipboard Sharing Tool Over Net March 2024 - Engineered a distributed application for cross-network clipboard sharing leveraging gRPC and GoLang, demonstrating proficiency in scalable system development.

GoLang Backend Developer — Novo Cab Nov 2022 - Mar 2023 - Developed a GoLang backend featuring real-time communication via WebSockets and integrated robust JWT authentication for secure API access. - Utilized MongoDB for efficient geospatial search capabilities and managed message queues with Redis and RabbitMQ for scalable data processing.

Full Stack Developer / CEO and Founder — vizvasrj.com Jan 2021 - Sept 2022 - Architected and deployed a highly scalable Python-based microservice architecture for automated blog post translation into 25 languages. - Designed and implemented fault-tolerant microservices using the Falcon framework and MongoDB, exposing REST APIs to handle large volumes of requests from Django Celery. - Optimized system performance by 45% through strategic implementation of Redis caching for data-intensive operations. - Developed lightweight Flask-based microservices for efficient data parsing, translation, and speech conversion, showcasing expertise in distributed systems. - Utilized AWS (boto3) and Linode for scalable storage of generated speech files, demonstrating hands-on cloud experience. - Implemented a Python-based load balancer to orchestrate translation tasks across 30 machines, ensuring high throughput and resilience for large datasets. - Contributed to high-quality code through extensive use of Django Rest Framework for API development and integration of NLP libraries for complex text processing.

Projects

- **Kubernetes Guestbook App:** Scalable Deployment with Rolling Updates
- **Social Network Website Development:** Using PHP, HTML5, CSS, and JavaScript
- **Facial Recognition System Development:** Using Ubuntu, IP Camera, and Raspberry Pi
- **Webview Android Application Development:** For university
