

Saurav Raj

Location: Hazaribagh, Jharkhand, India (Willing to relocate to Bangalore for a Hybrid role) **Website:** sauravraj.dev
Email: saurav.raj.ash@gmail.com **GitHub:** [vizvasrj](https://github.com/vizvasrj) **Phone:** +91 9006912014

Professional Summary

Backend Engineer with over 2.5 years of experience architecting and leading the development of scalable, cloud-native applications. My core expertise is in **Golang** and building robust microservice architectures on **AWS** and GCP. As a founder, I have a proven track record of taking complete ownership of a product's lifecycle, from initial design and coding with **PostgreSQL** to managing automated testing and deployment, directly aligning with the 'work like an owner' culture at Posium.

Skills

- **Core Backend & Architecture:**
 - **Golang (Go): 4/5**
 - Microservice & Service Architecture: 4/5
 - RESTful & gRPC API Design: 4/5
 - Problem-Solving & Coding: 5/5
- **Cloud-Native Technologies:**
 - **AWS: 4/5**
 - GCP: 4/5
 - Docker & Containerization: 4/5
 - Kubernetes: 2/5
- **Databases & Data Engines:**
 - **PostgreSQL: 4/5**
 - **Elasticsearch (Familiar): 2/5**
 - MongoDB: 3/5
 - Redis: 4/5
- **Other Relevant Technologies:**
 - Node.js (Familiar): 3/5
 - Python (Django, Flask): 4/5
 - Git & CI/CD Principles: 4/5

Professional Experience

Technical Lead & Founder — vizvasrj.com Jan 2021 - Sept 2022

- **Owned and led** the end-to-end development of a complex web platform, acting as the sole architect and backend engineer for a major software product.
- Designed and built a scalable backend using Python, Celery, and a **PostgreSQL** database, focusing on robust architecture and code quality.
- Developed and managed a full suite of RESTful APIs, and was personally responsible for **designing, coding, and managing automated test scripts** and the continuous deployment pipeline.
- Self-documented all development processes and architecture to ensure maintainability and future scalability.

GoLang Backend Developer — Novo Cab Nov 2022 - Mar 2023

- Developed new features and enhanced existing ones for a high-performance backend system using **Golang**.
- Implemented a real-time chat service using WebSockets and managed data flow with RabbitMQ and Redis, demonstrating strong skills in building components for a modern server stack.

Full Stack Developer — aapan.shop Mar 2024 - Nov 2024

- Collaborated within a high-performance team to build and optimize backend services in **Golang** for an e-commerce platform.
- Focused on enhancing API performance and scalability to support a seamless user experience, working closely with front-end engineers.

Key Certifications

- **Professional Certificate: IBM AI Engineering (2025)**
 - [View Certificate](#)
- **Architecting Solutions on AWS (2023)**
 - [View Certificate](#)
- **Introduction to Containers w/ Docker, Kubernetes & OpenShift (2024)**
 - [View Certificate](#)
- **Architecting with Google Kubernetes Engine: Foundations (2022)**
 - [View Certificate](#)

Education

MCA (2024-2026) Aisect University, Jharkhand

BCA (Computer Science and IT) (2016-2019) Amity University Jharkhand
