

Saurav Raj

Location: Hazaribagh, Jharkhand, India (Open to relocating to Bangalore) **Email:** saurav.raj.ash@gmail.com **GitHub:** vizvasrj **Phone:** +91 9006912014

Professional Summary

Results-driven Backend Developer with over 2.5 years of dedicated professional experience, complemented by 2 years as a founder leading software development, bringing nearly 5 years of intense coding experience. Specializing in Python-based microservices and robust API layers, I excel in designing, building, testing, and deploying scalable applications that handle large amounts of data. Proficient in cloud platforms like AWS, containerization (Docker, Kubernetes), and modern database management (PostgreSQL, Redis). Passionate about crafting maintainable code, rigorous testing, effective documentation, and mentoring junior developers to foster high-performing teams.

Skills

- **Primary Backend & Python:**
 - Python (5+ years experience across roles): 4/5
 - Django & Django Rest Framework: 4/5
 - Flask: 3/5
 - Microservices Architecture: 4/5
 - RESTful API Design & Development (including data caching, JWT auth, load testing principles): 4/5
- **Cloud & DevOps:**
 - AWS (Hands-on experience): 4/5
 - GCP: 4/5
 - Docker & Containerization: 4/5
 - Kubernetes & Orchestration: 2/5 (Conceptual and hands-on project experience)
 - Serverless Computing (conceptual understanding of AWS Lambda): 2/5
 - CI/CD Principles (Git, automated builds/deployments): 4/5
- **Data & Databases:**
 - PostgreSQL (SQL): 4/5
 - Redis (Caching & Data Structures): 4/5
 - MongoDB (NoSQL): 3/5
 - Experience processing and analyzing large data sets.
 - Familiarity with cloud-native data warehousing concepts (e.g., Amazon Redshift, Google BigQuery).
- **System & Tools:**
 - Linux/Unix Systems & Bash Scripting: 4/5
 - Git (branching, conflict resolution, pull requests): 4/5
 - Code Review & Quality Assurance: 4/5
 - Rigorous Testing (Unit, Functional, & Integration Testing Principles)
 - Performance Profiling & Debugging
 - API Security Best Practices
 - Documentation & Architecture Design

Experience

- Full Stack Developer / CEO and Founder** — vizvasrj.com Jan 2021 - Sept 2022 (2 years)
- Led the entire software development lifecycle as Founder, architecting and building a scalable web platform using **Python (Django, Falcon)** and **PostgreSQL**.
 - Designed, authored, and debugged a robust **RESTful API layer** using Django Rest Framework, incorporating **data caching (Redis)** and **JWT authentication** principles to handle high traffic and ensure security.
 - Developed distributed/scalable **microservices**, managing deployment across 30 machines and implementing a load balancer, demonstrating expertise in handling large amounts of data.
 - Performed rigorous **unit and integration testing** on developed features, contributing to a high-quality codebase and ensuring maintainability.
 - Guided technical direction and set best practices, effectively **mentoring** collaborators and contributing to **code reviews**, elevating overall team effectiveness.
 - Utilized **Linux/Unix** environments and **bash scripting** for system management and automation.
 - Created clear **documentation** for development processes and key architectural designs to ensure reusability and clarity.
 - Identified and fixed performance bottlenecks, optimizing API response times and overall application efficiency.
- GoLang Backend Developer** — Novo Cab Nov 2022 - Mar 2023 (5 months)
- Developed high-performance backend **microservices** in Golang for a real-time application, implementing secure **JWT authentication** and WebSocket communication.
 - Utilized **Docker** for containerizing application components and managed data with MongoDB and Redis, showcasing robust distributed system design.

- Full Stack Developer** — aapan.shop Mar 2024 - Nov 2024 (8 months)
- Collaborated within an agile team to build and optimize backend services in Golang for an e-commerce platform.
 - Focused on enhancing **API performance** and scalability to support a seamless user experience, working closely with front-end engineers and contributing to a high-quality codebase.
-

Education

MCA (2024-2026) Aisect University, Jharkhand
BCA (Computer Science and Information Technology) (2016-2019) Amity University Jharkhand

Certificates

- **IBM Full Stack Software Developer (2024)** (includes Django Application Development)
- **Architecting Solutions on AWS (2023)**
- **Introduction to Containers w/ Docker, Kubernetes & OpenShift (2024)**
- **Architecting with Google Kubernetes Engine: Workloads & Foundations (2022)**
